

Joint Petition To
Susan Templeman

Mark Greenhill

Scott Morrison

Trish Doyle, Andy Penn

We call upon Federal Member, Blue Mountains Mayor, Local Councillors, (as well as the NSW Premier, Prime Minister and CEO of Telstra) to take whatever action necessary to stop all installation of 5G technology in the Blue Mountains region until such technology has been researched and proven safe to Individuals & Environment & the consent of the Community has been obtained.

Recently Brussels became the first major city to stop 5G being installed. Over 180 Scientists and Doctors from 35 countries sent a declaration to the European Commission demanding a moratorium on installation of antennas for 5G due to "*Concerns over health effects from higher radiation exposure include potential neurological impacts, infertility, and cancer*". Recently the US Govt National Toxicology Program, after a ten year study on the effect of 2 & 3G on rats stated there is a clear link between cell phones and cancer. 5G will be more intense.

The 5G signal is easily blocked by objects requiring antennas/towers as close as 100-200m apart in residential areas. We have no idea what the long term effects may be such as cancers, danger to the environment such as disappearing bees & even property price drops(if close to a tower/antenna). It's not just us, but our children and future generations. We are not lab rats!
